Streaming Latency Breakdown & Production SLA Safety Margins

Stage-by-stage empirical latency (P50, P90, P99) across Fast-Path and Forensics pipelines (AMD EPYC 7763 + NVIDIA A100)

Peak Throughput: 31,200 tx/s | Fast-Path P99: 0.82 ms

(a) Stage-by-Stage Latency (P50 Median & P99 Tail Whisker)

(b) Cumulative Latency vs Statutory Banking SLAs
